

MICK GEORGE LTD 2010 RECYCLING STATEMENT

Mick George Ltd are constantly striving to increase recycling rates by investing in equipment and people at our Waste Management facilities. Environmental and financial drivers are changing the way we handle waste at a rapid pace. At Mick George Ltd we are committed to helping the Environment and our customers by diverting waste away from landfill with the aim of reducing, reusing or recycling waste. With this in mind Mick George Ltd has found alternative homes for the following materials;

- Soils, inert or contaminated
- Hardcore and concrete
- Paper and cardboard
- Wood including MDF and contaminated wood
- Plasterboard
- Non-ferrous and ferrous metals
- Polythene
- Plastics
- Vegetation and green waste
- Glass
- Food
- Cable wire
- UPVC Windows
- Waste electrical and electronic equipment (WEEE)

The effect of finding alternative homes for the above materials has increased our recycling rates across the company to 85%. Our objective is to achieve 100% landfill diversion and we are confident that we can achieve this by 2015.

Mick George Ltd are a responsible company providing sustainable solutions for the Environment and will continue strive to improve our landfill diversion rates by innovation and hard work.
